Giving authors a voice in AMERICA,
the old-fashioned way:

We publish for free!
We translate for free!

Facts and Figures

About One Of America's Most Spectacular Book Publishing Companies

FACT #1: Unique among all traditional book publishing companies, America Star Books has served **50,000** authors since 1999. More than **3,000** books written by **foreign authors** are now in the process of being translated into English for publication in the United States.

FACT #2: We pride ourselves in giving new and unknown authors the opportunity they deserve by maintaining **lower acceptance barriers** than any other traditional book publishing company. We further lower the barrier to publication by including no, as in: **zero**, author fees in our standard contract. The essential process of preparing a book's final manuscript for production?, and of formatting, custom designing, and illustrating the pages and cover, and of making them available to bookstores worldwide, and of informing news media upon the book's release, is **absolutely free**. We **translate** from foreign languages into English also for **absolutely free**.

FACT #3: National TV stations ABC, CNN, FOX TV, and MSNBC have broadcast interviews with America Star Books authors to millions nationwide. Iconic radio hosts Rush Limbaugh, Don Imus,

Oliver North, and NPR grande dame Diane Rehm have done the same on national radio, broadcasting to millions of listeners. America Star Books authors have also been interviewed, reviewed or introduced in countless **newspapers** across the country, from the Washington Post to the Los Angeles Times to Women's World Magazine to the New York Times. America Star Books issues many hundreds of **press releases** about our new book releases every week, for free.

FACT #4: The average time to get a book to print is between two to six months. Translation time depends on how many foreign books are waiting in line. The design and **production process can usually be significantly expedited** if the author promptly submits all necessary information and materials, and if he or she is a fast communicator when responding to inquiries from America Star Books's staff. Rush releases are also available, at a rush fee.

FACT #5: Today, the entire publishing industry uses the **digital printing technology**, aka Print-on-Demand or POD. It allows the printer to manufacture a book in any quantity at a time from one to thousands. America Star Books uses this POD technology to print books as they are ordered rather than printing an inventory of its titles prior to publication. By reducing its overhead, America Star Books has found a way to offer its authors a contract without requiring a fee.

FACT #6: America Star Books is a traditional, royalty paying publisher. The author is never obligated or expected to pull their wallet to make any purchase whatsoever. All expenses involved with acquiring new titles, formatting, custom designing, and illustrating the final manuscript into a book, translating a foreign book into English, making books fully available to all bookstores at home and abroad, and informing news media upon the release of a new book, are underwritten by America Star Books solely.

FACT #7: While America Star Books performs the essential publishing functions for free, it also encourages authors to get heavily involved in the promotion of their books. **No two books are the same**, no two genres are the same, **no two authors are the same**, which puts limitations to a one-size-fits-all approach. In order to assist authors with promotion, America Star Books has a *Special Services* department, staff who provide, as the name says, *special* services that go above and beyond our one-size-fits-all free production, publishing and press release service. They attend **book fairs and festivals at home and abroad**, to promote books and/or authors, or seek to draw the attention of select vendors and/or media, or attempt to sell foreign rights to foreign publishers, etcetera. They charge a promotion fee for the *special* services. These services are optional. Thousands of authors have requested these services. Thousands of authors have not.

FACT #8: America Star Books authors have done thousands and thousands of book signings at bookstores, libraries, and many, many other venues including an aircraft carrier. **Bookstores** order America Star Books titles numerous times every day. **Amazon.com** and **BarnesandNoble.com** list all America Star Books titles.

FACT #9: **Our art department custom designs all book covers.** We take author provided suggestions and ideas into serious consideration. We know our authors want quality, and we produce quality. Our book covers are widely praised throughout the industry. **America Star Books artists also illustrate children's books for free.**

FACT #10: **Movie rights, audio rights, TV rights, merchandising rights, the copyright all remain the author's.** We are only interested in publishing rights. We don't want any other rights, unless an author requests that we carry them, so that we can negotiate on the author's behalf with third parties.

FACT #11: Ebooks: electronic publishing rights are part of every book's publishing rights. America Star Books has converted thousands of our books into e-books for Amazon's **Kindle**, Barnes and Noble's Nook, Kobo, and Google's e-book store, typically at a fee.

FACT #12: Exciting changes have transformed the book publishing industry. Many more authors can join the ranks of published authors each year, resulting, among many other things, in the release of over a million new titles each year. Every book's success begins with the author helping to raise awareness. We hope that you will work with us, toward raising your book's chances of success. Always remember: having a book in publication alone is not enough. **Don't enter the publishing world with false, unrealistic expectations.**
